

# RENXIAN TANG

Bachelor of Information Technology

Renxian.tang@my.jcu.edu.au | +65 8085 7967 | Singapore

## EDUCATION

### James Cook University

2025 – 2026

Bachelor of Information Technology

## SKILLS

**Programming:** Python, Java, SQL, JavaScript

**Mobile Dev:** Android, Flutter, Cross-Platform

**Web Development:** HTML, CSS, React, Node.js

**Machine Learning:** TensorFlow, PyTorch, Scikit-learn

**Data Analysis:** Pandas, NumPy, Matplotlib, Seaborn

**Tools:** Git, Jupyter, VS Code, Android Studio

## PROJECTS

### Stock Analysis Model & Client Application

2026

*Design Thinking Project — Team Collaboration*

- Collaborated in a cross-functional team to design and train a machine learning model for stock trend prediction using historical market data
- Built a responsive client application that visualizes real-time model predictions and delivers actionable investment insights
- Integrated the trained model into the client via RESTful API, enabling seamless data flow between backend and frontend
- Applied design thinking methodology to iteratively prototype and refine the user interface based on feedback

### Cross-Border Travel Mobile Application

2025

*Mobile Computing Project — Independent Development*

- Independently designed and developed a full-featured cross-border travel application from concept to deployment
- Implemented core modules including multi-currency converter, itinerary planner, location-based services, and travel document manager
- Conducted comprehensive reliability testing covering functional, performance, and edge-case scenarios — all test cases passed
- Ensured consistent user experience and responsive layout across multiple device configurations and screen sizes

### Deep Learning Model Training & Analysis

2025

*Deep Learning Project — Team Collaboration*

- Collaborated with team members to construct and train deep learning models on structured real-world datasets
- Performed end-to-end data pipeline tasks including preprocessing, feature engineering, hyperparameter tuning, and model evaluation
- Conducted in-depth analysis of model outputs using statistical methods and visualization techniques, producing data-driven insights
- Documented methodology and findings, presenting results to faculty reviewers with clear visualizations and conclusions

## LANGUAGES

**Chinese** — Native

**English** — Professional Working Proficiency
